## The Safer Access Network of Expertise

---

The success of your organisation hinges on many things, but one of them is having access to the right people. Using our experience and principles, our network, our sector-wide coverage and our unique database, we are able to obtain good candidates on your behalf. Our candidates all undergo a thorough process of background checks, unique in the field of humanitarian recruiting. This process ensures both the personal and professional suitability of the candidate.

To prevent wasted time and raised expectations, we act initially as a broker between both parties before introductions are made. We remain available to both parties throughout the process to clarify any issues that may arise during the recruitment. In some cases, Safer Access Advisors or Safer Access Associates will be contracted or recruited for the post in question. Agencies that recruit our experts gain the benefit of their ability to reach-back directly to Safer Access for support whenever the need arises.

The Safer Access database contains many suitable specialists, and allows us to aid organizations in finding the right candidate for medium and long-term posts.

If you would like to know more about this service please contact us at: [recruitment@saferaccess.org](mailto:recruitment@saferaccess.org).
